BuildNext360

The Complete Construction Management ERP Platform

One platform for the full construction delivery journey

Construction businesses today face growing pressure to win work faster, keep projects on schedule and budget, maintain financial visibility, and deliver a seamless client experience.

BuildNext360 provides a centralized platform to manage every stage of the construction journey — from lead and opportunity tracking, BOQ and quotations, contracts and project setup, through procurement, site progress, variations, payments, and final handover.

By bringing client management, estimating, project delivery, procurement, documentation, and business intelligence into a single integrated system, organizations gain greater control, operational efficiency, and real-time visibility across house, apartment, and commercial builds.

Whether you manage a single residential project or multiple large-scale developments, BuildNext360 helps teams reduce manual effort, improve collaboration, streamline workflows, and make informed decisions with confidence.

Transforming Every Stage of the Construction Lifecycle

BuildNext360 connects every stage of the construction journey, from first client inquiry to project handover, through a single integrated platform.

By eliminating manual tracking, disconnected spreadsheets, and repetitive administrative tasks, organizations can improve operational efficiency, accelerate project delivery, and gain complete visibility across estimates, sites, and client interactions.

30%

Faster Lead Conversion

Respond to inquiries quickly and improve sales conversion rates.

50%

Reduced Processing Time

Digitize reservations, agreements, and approval workflows.

100%

Sales Visibility

Track sales performance, collections, and project status in real time.

25%

Improved Collection Efficiency

Monitor installment payments and reduce overdue accounts.

LEAD · ESTIMATE · CONTRACT · PROCUREMENT · SITE PROGRESS · HANDOVER

Why BuildNext360?

Most construction companies struggle with:

- Customer inquiries scattered across WhatsApp, Facebook and phone calls
- Delayed procurement and material shortages
- Manual BOQ and estimate tracking
- Manual budget and variation calculations
- Quotation and contract version conflicts
- Lack of visibility into sales performance
- Poor lead and follow-up discipline
- Slow site progress and approval workflows

BuildNext360 eliminates these challenges with a single connected platform built specifically for the construction industry. By centralizing client management, estimating, project delivery, procurement, site operations, and business intelligence, organizations gain greater visibility, streamlined processes, and the ability to scale operations with confidence.

Features of BuildNext360

Customer Relationship Management

1. Lead Management

- Lead Registration
- Bulk Lead Import
- Lead Assignment & Reassignment
- Follow-Up Scheduling
- Opportunity Pipeline Tracking
- Lead Source Tracking
- Inquiry Tracking

2. Client Management

- Client Profiles
- Client Contact Directory
- Client Communication History
- Client Account Overview
- Client Relationship Tracking

3. Opportunity Management

- Opportunity Creation & Ownership
- Stage-Based Sales Pipeline
- Probability & Expected Close Tracking
- Lead-to-Client Conversion
- Opportunity-Linked Quotations

Estimating, Projects & Delivery

1. Project Management

- Construction Project Portfolio
- Project Setup & Configuration
- Project Team Assignment
- Project Budget Management
- Milestone & Document Tracking
- Multi-Project Visibility

2. Estimating & BOQ

- BOQ Creation & Item Libraries
- Rate Library Management
- Cost Estimation & Budgeting
- Template-Based Estimating
- Estimate Version Control

3. Contracts & Variations

- Contract Creation from Quotations
- Contract Approval Workflow
- Variation Order Management
- Contract Value Adjustments
- Variation Impact Tracking

Sales, Quotations & Approvals

1. Quotation Management

- Quotation Generation
- BOQ-Linked Pricing
- Discount & Tax Controls
- Quotation Expiry Monitoring
- Quotation Status Tracking
- Quotation-to-Contract Conversion
- Team-Based Sales Operations
- Sales Target Management

2. Approval & Workflow Control

- Multi-Level Approvals
- Quotation Submission Workflow
- Contract Approval Process
- Variation Approval Tracking
- Audit-Ready Decision History

Features of BuildNext360

Procurement, Inventory & Site

1. Procurement Management
- Purchase Request Creation
- Purchase Order Management
- Vendor Quotation (RFQ) Handling
- Goods Receipt Notes
- Procurement Approval Workflows
- Vendor Performance Tracking

2. Materials & Inventory
- Material Catalog Management
- Stock Receipt & Issue Tracking
- Wastage Monitoring
- Reorder Visibility
- Project Material Consumption

3. Site Operations
- Daily Site Diary
- Site Progress Updates
- Workforce & Visitor Logs
- Incident & Observation Tracking
- Progress Approval Workflows

Finance, Labour & Quality

1. Finance Operations
- Payment Certificate Tracking
- Accounts Receivable Visibility
- Accounts Payable Support
- Retention Management
- Financial Authorization Workflows

2. Labour Management
- Timesheet Entry
- Labour Cost Tracking
- Attendance Support
- Project Labour Visibility

3. Quality Control
- Inspection Checklists
- Pass/Fail Result Capture
- Corrective Action Tracking
- Quality Compliance Records

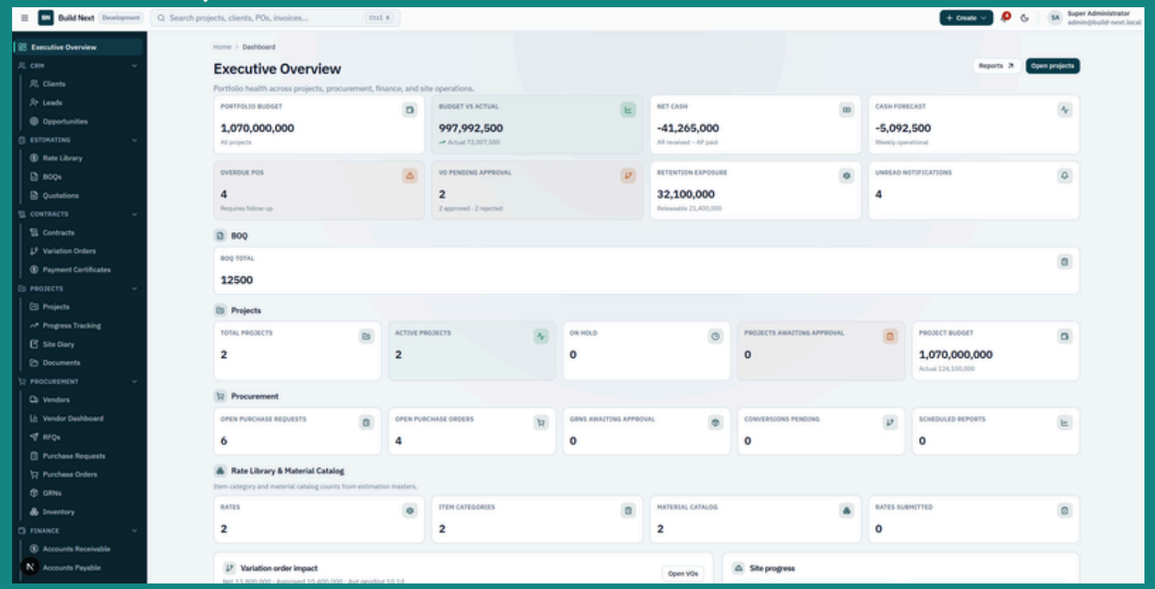

Dashboards & Business Intelligence

1. Executive Dashboards
- Sales Pipeline Performance
- Project Performance
- Cost & Budget Insights
- Procurement Status
- Team Productivity

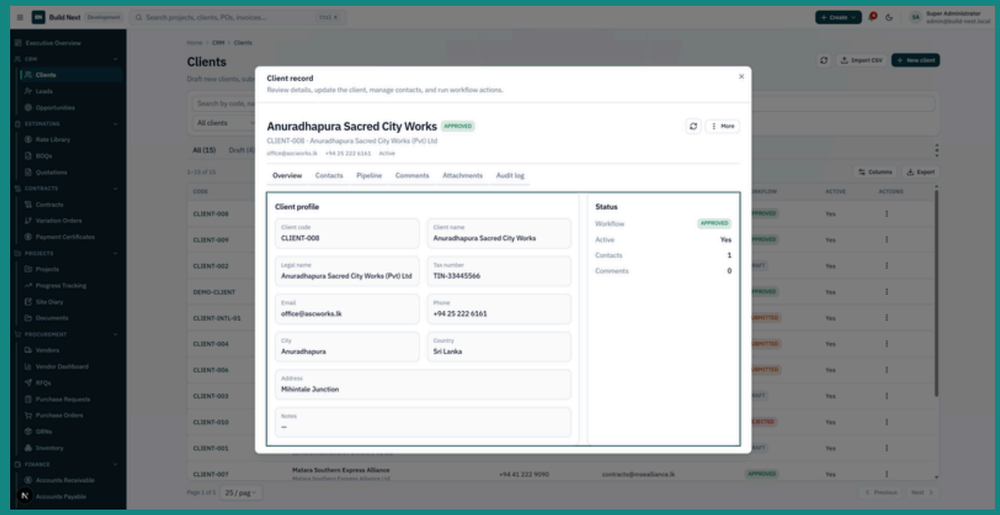

2. Analytics & Reporting
- Lead Conversion Analysis
- Quotation Win/Loss Analysis
- Project Progress Reporting
- Procurement & Cost Reports
- Business Management Reports

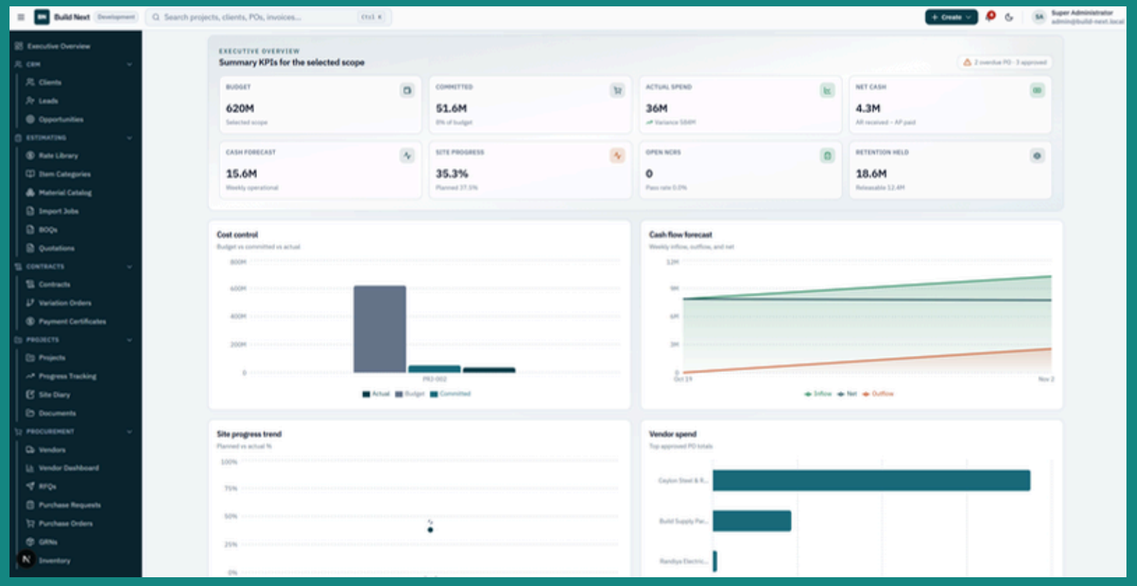

3. Security & Access Control
- Role-Based Permissions
- Multi-Level Approvals
- Activity Audit Logs
- Two-Factor Authentication
- User Access Management

"See portfolio health across CRM, procurement, finance, and site ops in one view."

"Track budget, actuals, net cash, and forecast before issues escalate."

"Forecast weekly cash inflow, outflow, and net position."

"See linked leads, contracts, and documents beside the profile."

Transform construction operations into real-time business intelligence with BuildNext360

BuildNext360 enables construction companies to connect customer acquisition, estimating, contracts, procurement, site operations, and financial control within a single intelligent platform.

By creating a unified operational environment, BuildNext gives organizations real-time visibility across projects, clients, sales performance, and delivery costs. Automation reduces manual effort, improves data accuracy, accelerates business processes, and helps teams make faster, more informed decisions.
